

# MAJESTIC®

## 12Volt Entertainment

Style | Quality | Sophistication

### ANTRV01

Gain:  
23dB

Range:  
48.5Mhz to 870Mhz (FM-VHF-UHF)

Impedance:  
75 Ohms

Power Consumption  
30mA – 70mA

Reception:  
360 Degrees

Amplifier  
Located in antenna for less noise.

The **ANTRV01** has been designed for installations that use a metal surface as a ground plane. The main application is for Car's, Trucks, SUV's, Motorhomes and RV's, the antenna will perform perfectly well in a marine installation only on a steel or aluminium hull.

Substituting a ground plane (or using a temporary plate) will not give you the true effects of a proper grounding that the chasis of a vehicle gives. If you don't have a ground plane our UFO is the recommended product which is design to operate independant of a ground plane.

*When it comes to the best technology, Majestic is leading the way.*
